Oil Can

Category: **Automotive** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Oil can; Oil cane

What it is used for

Use an oil can to apply small, controlled amounts of the specified lubricant to suitable machine or vehicle components.

How to use

1. Confirm the lubricant type is correct for the component and task.
2. Inspect the oil can, nozzle, cap, and body for leaks or damage.
3. Fill the can with clean lubricant and close the cap securely.
4. Identify the approved lubrication point and clean away loose dirt.
5. Apply a small amount of oil without overfilling the component.
6. Wipe away excess lubricant and check for leaks or spills.
7. Clean the nozzle and store the oil can after use.

⚠ Safety

- Do not apply oil to hot, moving, or energized parts unless an approved procedure allows it.
- Keep oil away from brakes, belts, tires, and other friction surfaces.
- Wear suitable gloves and clean spills promptly to prevent slips.
- Follow the lubricant label for handling and disposal.

Care & storage

- Wipe the can and nozzle clean after use.
- Store it upright in a labeled place away from heat and contaminants.
