Pipe Vice

Category: **Plumbing & Pipe Fitting** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Pipe vice; Yoke vise

What it is used for

Use a pipe vice to hold a pipe securely during cutting, threading, or other plumbing and pipe-fitting operations.

How to use

1. Choose a pipe vice suitable for the pipe diameter and material.
2. Inspect the jaws, frame, screw, and mounting arrangement for damage.
3. Securely mount the vice to a stable workbench or approved support.
4. Position the pipe so the working section is accessible and adequately supported.
5. Tighten the vice until the pipe is held firmly without crushing or deforming it.
6. Check the pipe for movement before cutting or threading.
7. Release the pipe carefully and clean the vice after use.

⚠ Safety

- Keep fingers clear of the jaws and screw mechanism.
- Support long pipes to prevent tipping or sudden movement.
- Do not exceed the vice's rated capacity or use damaged equipment.
- Depressurize and drain pipes before cutting or opening them.

Care & storage

- Remove metal chips, dirt, and moisture after use.
- Keep the screw mechanism maintained and store the vice securely.
