Timer

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Digital timer; Simple timer; Timer

What it is used for

Use a timer to measure or control a set duration during food preparation, cooking, or other timed tasks.

How to use

1. Check the timer display, buttons, and battery or power supply.
2. Set the required duration according to the recipe or task instructions.
3. Confirm the displayed time before starting the activity.
4. Start the timer when the timed process begins.
5. Respond to the alarm when the set time expires and check the task result.
6. Reset the timer before the next use.
7. Clean and store the timer after the activity.

⚠ Safety

- Do not rely on a timer alone to verify food safety or doneness.
- Keep non-waterproof timers away from liquids and hot surfaces.
- Follow safe cooking and food-handling procedures while the timer runs.

Care & storage

- Wipe the timer with a soft cloth and keep it dry.
- Store it safely and replace batteries when required.
