Tool Box

Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Basic Tool Box; Tool box; Tool Box (for minor repairs of pesticide application equipment)

What it is used for

Use a toolbox to carry, organize, and access suitable hand tools for routine inspection, maintenance, and minor repairs.

How to use

1. Inspect the toolbox, handle, hinges, latch, and compartments for damage.
2. Select tools appropriate for the planned repair or maintenance task.
3. Check each tool for wear, damage, or missing parts before use.
4. Arrange tools securely in their designated compartments.
5. Carry the closed toolbox by its handle and keep the load manageable.
6. Return cleaned tools to their assigned places after completing the task.
7. Close the toolbox and store it in the designated area.

⚠ Safety

- Do not carry a toolbox with a broken handle or unsecured contents.
- Use the correct tool for each task and avoid makeshift substitutions.
- Keep sharp tools covered and chemicals separate from general tools.
- Follow equipment isolation procedures before repairs, especially on electrical or pesticide equipment.

Care & storage

- Remove dirt and moisture from tools before returning them.
- Keep the toolbox dry, organized, and locked when required.
