Watering Can

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 7 labs

Covers these lab items: Water can; Watering Can; Watering Can , 8 to 10 Ltr.

What it is used for

Use a watering can to deliver water gently to plants, seedlings, or garden soil in a controlled amount.

How to use

1. Inspect the can, handle, spout, and rose attachment for damage or leaks.
2. Fill the can with clean water to a manageable level.
3. Carry it with a secure grip and avoid overfilling.
4. Direct the spout toward the soil near the plant roots.
5. Pour slowly to prevent soil erosion, splashing, or damage to seedlings.
6. Check that the soil receives enough water without prolonged pooling.
7. Empty, rinse, and store the watering can after use.

⚠ Safety

- Do not lift a full can beyond your safe handling capacity.
- Keep water away from electrical equipment and slippery walkways.
- Use clean water suitable for the plants being watered.
- Avoid spilling water where it may cause slips.

Care & storage

- Rinse the can and rose attachment after use.
- Store it empty in a shaded place to reduce damage and algae growth.
