Auger

Category: **Hand Tools - Striking & Digging** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Auger

What it is used for

Use an auger to bore holes in suitable soil or material for planting, posts, or other approved tasks.

How to use

1. Select an auger type and diameter suitable for the material and hole depth.
2. Inspect the bit, shaft, handle, and drive connection for damage.
3. Check the work area for buried cables, pipes, rocks, or other hazards.
4. Mark the hole location and secure the material or tool as appropriate.
5. Position the auger vertically and turn or operate it according to its design.
6. Remove soil or chips periodically and avoid forcing a jammed auger.
7. Withdraw the auger carefully, check the hole, and clean the tool after use.

⚠ Safety

- Wear eye protection, gloves, and sturdy footwear.
- Keep hands clear of rotating parts and stop powered augers before clearing blockages.
- Confirm underground utilities are located before drilling into the ground.
- Do not use an auger with a loose handle or damaged drive parts.

Care & storage

- Remove soil and moisture from the bit and shaft after use.
- Store the auger dry with the cutting edge protected.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
