Beaker

Category: **Laboratory Instruments & Glassware** Type: **Short SOP** Priority: **Medium**

6 labs

Covers these lab items: Beaker; Beaker / glass flask; Beaker 250ml; Glass beakers; Glassware/ Beakers

What it is used for

Use a beaker to hold, mix, heat, or measure approximate volumes of liquids during suitable laboratory procedures.

How to use

1. Select a beaker size and material suitable for the liquid and procedure.
2. Inspect the glass or plastic body for cracks, chips, or contamination.
3. Place the beaker on a stable, level surface before filling.
4. Pour the liquid carefully and use markings only for approximate volume measurement.
5. Use compatible heating equipment only if the beaker is rated for heating.
6. Label contents when required and avoid filling beyond a safe working level.
7. Dispose of contents according to laboratory procedures and clean the beaker after use.

⚠ Safety

- Wear suitable eye protection, gloves, and a lab coat when required.
- Do not use cracked or chipped glassware.
- Use heat-resistant protection when handling hot beakers and never assume glass is cool by touch.
- Do not heat a sealed beaker or use incompatible chemicals.

Care & storage

- Wash with a suitable laboratory detergent and rinse as required.
- Allow the beaker to dry and store it safely to prevent breakage.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
