Fish Net

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Fish net; Fishing tools; Hand net for transferring fish fry

What it is used for

Use a fish net to catch or transfer fish or fry gently while reducing injury and stress to aquatic animals.

How to use

1. Select a net with suitable mesh size and handle length for the fish.
2. Inspect the mesh, frame, handle, and joints for tears or sharp edges.
3. Prepare a suitable receiving container with water of appropriate quality and temperature.
4. Move the net slowly through the water and avoid chasing fish excessively.
5. Lift the net carefully and keep fish supported in water as much as possible.
6. Transfer fish promptly and gently into the prepared container.
7. Rinse the net and allow it to dry or disinfect it as required.

⚠ Safety

- Use clean equipment to reduce disease transfer between tanks or ponds.
- Avoid handling fish with dry hands or leaving them exposed to air unnecessarily.
- Keep sharp net frames away from people and delicate tank surfaces.
- Follow local rules for protected species and responsible fishing.

Care & storage

- Rinse off organic material after use and disinfect when required.
- Dry and store the net away from sunlight, pests, and sharp objects.
