Forceps

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Dissecting Forceps; Forceps; Forceps and brushes

What it is used for

Forceps are used to grip, hold, or manipulate small objects and materials during medical or laboratory tasks. Use the correct type for the intended procedure.

How to use

1. Inspect the forceps for cleanliness, damage, rust, or loose tips.
2. Wash and disinfect or sterilize according to the intended use and facility protocol.
3. Hold the forceps securely and grip the target material gently.
4. Use sterile forceps only when required for sterile procedures.
5. After use, clean and process reusable forceps according to protocol.
6. Check the tips and place the forceps in their designated storage area.

⚠ Safety

- Use sterile forceps for sterile procedures and avoid touching their working tips.
- Handle sharp or pointed tips carefully to prevent punctures and injuries.
- Do not use damaged, rusty, or contaminated forceps.
- Follow infection-control procedures when handling medical instruments.

Care & storage

- Clean, dry, and store forceps properly after use.
