# Hedge Shear

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 6 labs

**Covers these lab items:** Grass Shear; Hedge Shear

## What it is used for

Hedge shears are used to trim hedges, shrubs, and small soft branches. Use them for suitable plant growth rather than thick woody branches.

## How to use

1. Inspect blades, pivot, handles, and fasteners for damage or looseness.
2. Wear suitable gloves and eye protection before trimming.
3. Check the work area for people, wires, and hidden objects.
4. Hold both handles firmly and cut small sections with controlled movements.
5. Avoid forcing the blades through thick branches or hard material.
6. Remove plant debris, clean and dry the blades, and store safely.

## ⚠ Safety

- Keep hands and fingers away from the cutting edges.
- Never cut toward your body or another person.
- Do not use shears with loose handles or damaged blades.
- Carry shears with blades closed and pointed away from others.

## Care & storage

- Clean and dry blades after use; lubricate the pivot and protect blades from rust.

*Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.*
