Packaging Tool

Category: **Retail, Logistics & Warehouse** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Instruments used for opening packages and resealing packages; Instruments used for opening packages and resealing packages like cutters and strapping machines, clips etc.

What it is used for

Packaging tools are used to open packages, cut packaging materials, seal cartons, or secure loads with straps. Choose the correct tool for the package and packaging material.

How to use

1. Inspect cutters, tape dispensers, sealers, or strapping tools before use.
2. Choose the correct tool and confirm that its safety features work.
3. Place the package on a stable surface and keep the cutting path clear.
4. Cut tape or packaging away from your body using controlled movements.
5. For strapping tools, follow the equipment instructions and secure the strap correctly.
6. Collect scraps, retract or cover blades, and return tools to storage.

⚠ Safety

- Use safety cutters where available and keep fingers away from blades.
- Wear suitable eye protection when tensioning or cutting strapping.
- Never point a blade or tensioned strap toward another person.
- Do not use damaged tools or bypass safety guards.

Care & storage

- Clean tools after use, cover blades, and store them in a dry designated place.
