Sickle

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Sickle

What it is used for

A sickle is a curved hand tool used to cut grass, weeds, and suitable crop stems. Use it with controlled strokes for harvesting or garden maintenance.

How to use

1. Inspect the blade, handle, and attachment for cracks, looseness, or rust.
2. Wear suitable gloves and closed-toe footwear before cutting.
3. Clear the cutting area and check for stones, wires, or other obstacles.
4. Hold the handle firmly and cut with controlled strokes away from your body.
5. Keep other people at a safe distance while working.
6. Clean and dry the blade after use and store it with the edge protected.

⚠ Safety

- Keep hands and legs away from the cutting path.
- Never swing the sickle near other people or toward your body.
- Do not use a sickle with a loose handle or damaged blade.
- Carry and store the sickle with its blade covered.

Care & storage

- Clean, dry, and lightly oil the blade before storing it safely.
