Thermo-Hygrometer

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Hygrometer; Thermo-hygrometer

What it is used for

A thermo-hygrometer measures air temperature and relative humidity. Use it to monitor room conditions in classrooms, laboratories, storage areas, or workplaces.

How to use

1. Place the instrument in a shaded, ventilated location away from direct sunlight.
2. Keep it away from heaters, air conditioners, moisture sources, and direct airflow.
3. Allow the reading to stabilize according to the manufacturer's instructions.
4. Read the temperature and relative humidity from the display or scale.
5. Record the values with the date and time if monitoring conditions.
6. Return or leave the instrument in its designated monitoring position.

⚠ Safety

- Keep the instrument away from water unless it is rated for wet conditions.
- Do not expose it to temperatures or humidity beyond its specified range.
- Handle the sensor and display gently; do not open the casing unnecessarily.

Care & storage

- Keep the sensor area clean and check calibration or battery status as recommended.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
