Thimble

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Thimble

What it is used for

A thimble protects the fingertip while pushing a needle through fabric during hand sewing. Choose a size that fits securely without restricting finger movement.

How to use

1. Inspect the thimble for cracks, sharp edges, or deformation.
2. Choose a thimble that fits comfortably on the finger used to push the needle.
3. Place it securely on the fingertip before sewing.
4. Use the thimble to push the needle through fabric while guiding the needle with the other hand.
5. Remove the thimble after sewing and check it for damage.
6. Clean and store it in the sewing kit.

⚠ Safety

- Keep the needle pointed away from fingers and avoid forcing it through thick fabric.
- Do not use a cracked or poorly fitting thimble.
- Store needles separately and safely when not in use.

Care & storage

- Wipe the thimble clean and store it dry with sewing supplies.
