Thinning Scissors

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 6 labs

Covers these lab items: Thinning scissor; Thinning Scissors; Thinning Scissors, cutting scissor

What it is used for

Thinning scissors remove some hair bulk while leaving much of the hair length intact. Use them carefully to create a softer blend and avoid excessive thinning.

How to use

1. Inspect the thinning scissors for clean teeth, smooth movement, and secure pivot.
2. Consult the client about the desired result before starting.
3. Work on dry or suitably prepared hair according to the technique being used.
4. Separate a small section and hold it away from the scalp and face.
5. Make controlled cuts with the toothed blade positioned as intended for the technique.
6. Check the result gradually, clean the blades, and store the scissors safely.

⚠ Safety

- Keep fingers and blades away from the client's skin, ears, and eyes.
- Do not use damaged scissors or force the pivot.
- Avoid repeated thinning in the same area, which may leave uneven or sparse hair.

Care & storage

- Remove hair from the teeth, dry the blades, and store scissors in a protective case.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
