Bobbin

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Bobbin; Bobbins and other Sewing Machine Attachments; Bobbins, Bobbin case

What it is used for

A bobbin holds the lower thread used by a sewing machine to form stitches. Use the bobbin type and thread winding recommended for the machine.

How to use

1. Switch off the sewing machine before opening the bobbin area.
2. Remove the bobbin and bobbin case according to the machine instructions.
3. Check the bobbin for cracks, burrs, and tangled thread.
4. Wind the correct thread evenly onto the bobbin without overfilling it.
5. Insert the bobbin in the correct direction and route the thread through its guide.
6. Reassemble the bobbin area, test stitches on scrap fabric, and adjust if needed.

⚠ Safety

- Keep fingers away from moving machine parts while threading or testing.
- Do not use cracked, bent, or incompatible bobbins.
- Switch off the machine before removing or installing the bobbin.

Care & storage

- Remove lint regularly and store spare bobbins in a clean, dry container.
