Broom

Category: **Hospitality & Housekeeping** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Broom; Soft Broom (Indian)

What it is used for

A broom is used to sweep dust, dirt, and loose debris from floors and other suitable surfaces. Choose a broom suited to the surface and type of debris.

How to use

1. Inspect the broom handle and bristles for looseness or damage.
2. Remove large obstacles from the area before sweeping.
3. Hold the handle comfortably and sweep debris in controlled strokes toward one collection point.
4. Use short strokes in corners and along edges.
5. Collect the debris with a dustpan and dispose of it in the correct bin.
6. Shake or clean the bristles as appropriate and return the broom to storage.

⚠ Safety

- Use suitable footwear and avoid creating excessive dust in poorly ventilated areas.
- Keep the handle and broom head away from walkways when not in use.
- Do not sweep hazardous materials without the required protective equipment and procedure.

Care & storage

- Remove trapped debris and store the broom with bristles protected from bending.
