Computer Peripheral

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Computer speakers; Peripherals

What it is used for

Computer peripherals are external devices such as speakers, keyboards, mice, webcams, and printers that add functions to a computer. Connect and configure each device according to its interface and instructions.

How to use

1. Inspect the peripheral, cable, connector, and power adapter if present.
2. Check that the device is compatible with the computer and operating system.
3. Switch off the equipment when required and connect it to the correct port.
4. Power on the device and install or select the required driver or settings.
5. Test the device to confirm that it works correctly.
6. Disconnect using the recommended method and store accessories neatly.

⚠ Safety

- Keep electrical devices and connectors away from liquids.
- Do not force connectors into ports or use damaged cables.
- Switch off and unplug equipment before cleaning or handling internal connections.

Care & storage

- Clean peripherals with suitable materials and keep cables organized and undamaged.
