Fire Bucket

Category: **Safety & PPE** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Fire buckets; Sand Bucket

What it is used for

A fire bucket holds sand or another designated extinguishing material for use during suitable small fires. Keep it accessible and use it only for fire types the material can safely control.

How to use

1. Check that the bucket is clearly marked and contains the designated material.
2. Keep the bucket in its assigned, accessible fire-safety location.
3. When a suitable small fire occurs, raise the alarm and follow the site's emergency procedure.
4. Use the appropriate protective equipment and approach only if the escape route remains clear.
5. Apply sand carefully to smother a compatible small fire without spreading burning material.
6. Report use, replace contaminated material, and restore the bucket to its location.

⚠ Safety

- Raise the alarm and contact emergency services according to the site procedure.
- Do not use sand on fires involving energized electrical equipment unless trained and the procedure permits it.
- Never use water or sand on a fire if the material or fire type makes it unsafe.
- Do not attempt to fight a spreading fire; evacuate immediately.

Care & storage

- Keep the bucket clean, filled as designated, dry where appropriate, and unobstructed.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
