Hand Cultivator

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Hand Cultivator

What it is used for

A hand cultivator loosens surface soil, removes small weeds, and helps aerate soil around plants. Use it carefully to avoid damaging roots or buried irrigation lines.

How to use

1. Inspect the cultivator tines and handle for cracks, looseness, or rust.
2. Wear gloves and clear stones or other obstacles from the working area.
3. Hold the handle firmly and place the tines near the soil surface.
4. Pull or push the tool through the soil with controlled shallow movements.
5. Work around plants carefully and avoid deep strokes near roots or irrigation lines.
6. Remove soil from the tines, dry the tool, and store it safely.

⚠ Safety

- Wear gloves and closed-toe footwear while cultivating soil.
- Keep fingers and feet away from the tines.
- Do not use a tool with loose handles or damaged tines.
- Check for buried cables or pipes before digging in unfamiliar ground.

Care & storage

- Clean and dry the metal tines after use and protect them from rust.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
