Category: **Laboratory Instruments & Glassware** Type: **Short SOP** Priority: **Medium**

5 labs

Covers these lab items: Glass wares; Glass wares (Beakers 500 ml, Funnels, Flasks conical 200 ml & 500 ml); Glassware

What it is used for

Laboratory glassware is used to hold, mix, transfer, or measure liquids during laboratory work. Choose glassware suitable for the substance, temperature, and required measurement accuracy.

How to use

1. Inspect each item for cracks, chips, contamination, or damaged markings.
2. Select the correct glassware for the task and confirm its volume or capacity.
3. Wash and rinse glassware according to the laboratory procedure before use.
4. Place it on a stable surface and handle it carefully while filling or pouring.
5. Use suitable tools or heat-resistant glassware when heating is required.
6. After use, dispose of contents correctly, clean the glassware, and return it to storage.

⚠ Safety

- Wear suitable eye protection and other required laboratory PPE.
- Do not use cracked or chipped glassware, especially for heating or pressure.
- Never heat closed glassware or use ordinary glassware over a flame unless designed for it.
- Dispose of broken glass in a designated sharps or broken-glass container.

Care & storage

- Clean, dry, and store glassware in its designated area without stacking it unsafely.
