Locking Pliers

Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Locking wrenches; Vise Grip

What it is used for

Locking pliers grip and hold objects securely using an adjustable locking mechanism. Choose the correct jaw size and pressure for the workpiece to avoid damage.

How to use

1. Inspect the jaws, adjustment screw, release lever, and pivot for damage.
2. Adjust the jaw opening to fit the workpiece.
3. Position the jaws fully around the object and keep fingers clear of the closing area.
4. Squeeze the handles until the pliers lock securely without crushing the workpiece.
5. Perform the task while checking that the object remains stable.
6. Operate the release lever carefully, remove the pliers, and clean them after use.

⚠ Safety

- Keep fingers away from the jaws and locking mechanism.
- Do not use locking pliers as a substitute for a proper wrench when torque accuracy is required.
- Avoid excessive clamping force that may damage the workpiece.
- Do not use pliers with cracked jaws or a faulty release mechanism.

Care & storage

- Wipe the pliers clean, lightly lubricate the pivot when needed, and store them dry.
