Photocopier

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Photocopier

What it is used for

A photocopier produces paper copies of documents and images. Use the correct paper size and copy settings to obtain clear, accurate copies.

How to use

1. Check the copier for visible damage, paper jams, and sufficient paper and toner.
2. Switch on the machine and wait until it is ready.
3. Place the original document on the glass or in the document feeder as directed.
4. Select paper size, number of copies, colour mode, and other required settings.
5. Press the start button and collect the copies when printing finishes.
6. Remove any leftover originals and report persistent errors or jams.

⚠ Safety

- Keep fingers away from moving parts and hot internal components.
- Do not force open panels or remove jammed paper against machine instructions.
- Keep liquids away from the copier and electrical connections.

Care & storage

- Clean the glass with an approved cloth and refill paper and toner as required.
