Tablet

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Electronic tablets with species identification apps; Mobile devices or tablets for simulation of digital guest registration and feedback; Tablets; Tablets for visual aids during storytelling; Tablets or mobile devices

What it is used for

A tablet is a portable touchscreen device used for digital forms, learning apps, communication, and data collection. Use approved applications and protect stored information.

How to use

1. Inspect the tablet, screen, buttons, charging port, and battery condition.
2. Switch on the device and unlock it using the approved method.
3. Connect to an authorized network if required and open the intended application.
4. Enter information carefully and check entries before saving or submitting.
5. Save work and confirm that the information has been stored correctly.
6. Sign out of shared accounts when required, clean the screen, and store the tablet safely.

⚠ Safety

- Keep the tablet away from liquids, extreme heat, and physical impact.
- Use only authorized applications and networks for work-related data.
- Do not share passwords or leave sensitive information visible on a shared device.

Care & storage

- Clean the screen with a suitable cloth, charge as directed, and use a protective case.
