Two-Way Radio

Category: **Telecom & Networking** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Two Way Radios and Chargers; Two-way radios and emergency alert systems; Two-way radios and emergency communication devices; Walkie talky; Walkie-Talkie / Intercom

What it is used for

A two-way radio allows short-range voice communication between team members without using a telephone network. Use the assigned channel and follow communication procedures.

How to use

1. Inspect the radio, antenna, battery, buttons, and microphone for damage.
2. Charge the battery and attach the antenna if it is removable.
3. Switch on the radio and select the assigned channel or group.
4. Press and hold the push-to-talk button before speaking clearly.
5. Release the button to listen and wait for the other person to respond.
6. Switch off the radio after use and place it on charge or in storage as required.

⚠ Safety

- Use only authorized frequencies and follow local radio regulations.
- Do not transmit near explosive atmospheres unless the radio is approved for that environment.
- Keep the antenna intact and do not hold it against your face during transmission.
- Keep communication concise during emergencies and follow the site emergency plan.

Care & storage

- Keep the radio clean and dry, charge batteries correctly, and store it securely.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
