Utility Knife

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 5 labs

Covers these lab items: Cutter (utility knife); Razor Blade Knife (Utility Knife); Safety Knife; Utility Knife

What it is used for

A utility knife is used to cut cardboard, packaging, and other suitable materials. Select the correct blade and use the safety mechanism to reduce the risk of injury.

How to use

1. Inspect the knife body, blade, locking mechanism, and handle for damage.
2. Choose a blade suitable for the material and extend only the required length.
3. Place the material on a stable cutting surface and keep the cutting path clear.
4. Hold the knife firmly and cut away from your body with controlled pressure.
5. Retract or lock the blade immediately after cutting.
6. Dispose of worn blades in a designated sharps container and store the knife safely.

⚠ Safety

- Keep fingers and other body parts away from the blade path.
- Do not cut toward yourself or hold the material in the cutting path.
- Never use a loose, broken, or blunt blade.
- Retract the blade before carrying or storing the knife.

Care & storage

- Replace worn blades safely and keep the knife clean and dry.
