Calculator

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 4 labs

Covers these lab items: Calculator; Financial Calculators

What it is used for

A calculator performs arithmetic and other mathematical operations for study, office work, and financial calculations. Select the appropriate mode and verify inputs before relying on the result.

How to use

1. Inspect the calculator, display, buttons, and battery or power supply.
2. Switch it on and select the required mode if applicable.
3. Enter the numbers and operation carefully, checking decimal points and signs.
4. Press the calculation key and review the displayed result.
5. Clear the entry and repeat the calculation if an input error is found.
6. Switch off the calculator if needed and store it safely after use.

⚠ Safety

- Keep the calculator dry and away from excessive heat.
- Do not use a device with a damaged battery compartment or exposed wiring.
- Verify important financial or technical calculations independently.

Care & storage

- Clean the keys and display with a soft dry cloth and replace batteries as directed.
