Cleaning Brush

Category: **Hospitality & Housekeeping** Type: **Short SOP** Priority: **Medium** 4 labs

Covers these lab items: Cleaning Brush; Cleaning Brushes; Dusting Brush; Funner (cleaning brush)

What it is used for

To remove dust, dirt, and loose debris from surfaces using a suitable cleaning brush. To clean effectively without scratching surfaces or spreading contamination.

Main parts

- Brush handle
- Bristles
- Brush head
- Hanging hole or grip, if fitted

Before you start

1. Choose bristle type suitable for the surface and dirt.
2. Check that the bristles and handle are clean and intact.
3. Wear gloves or a mask if the cleaning task requires them.
4. Separate brushes used for different areas or hygiene zones.

How to use

1. Remove loose objects from the surface where practical.
2. Hold the brush securely by its handle.
3. Brush from the cleaner area toward the dirtier area when appropriate.
4. Use controlled strokes suited to the surface.
5. Collect loosened dust and debris for proper disposal.
6. Wash or disinfect the brush when required by the cleaning procedure.
7. Allow the brush to dry before storage.

⚠ Safety

- Avoid brushing near eyes or exposed skin with stiff bristles.
- Use appropriate protection for dusty or contaminated areas.
- Do not use damaged brushes that may shed bristles.
- Follow hygiene rules for food, healthcare, and sanitation areas.

Care & storage

- Remove trapped debris after use.
- Wash and disinfect as appropriate for the task.

- Dry thoroughly and store away from contamination.
- Replace worn or shedding brushes.

Common mistakes to avoid

- Using the same brush across incompatible hygiene zones.
- Using stiff bristles on delicate surfaces.
- Spreading dust instead of collecting it.
- Storing a wet or contaminated brush.
