Garden Knife

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 4 labs

Covers these lab items: Garden Knife

What it is used for

To cut, trim, or harvest small plants and garden materials using a garden knife. To make controlled cuts while protecting the user and nearby plants.

Main parts

- Blade
- Handle
- Grip or guard
- Protective sheath

Before you start

1. Select a knife suitable for the intended gardening task.
2. Inspect the blade, handle, and sheath for damage.
3. Wear suitable gloves and closed footwear where appropriate.
4. Clear the work area and identify the intended cut.

How to use

1. Hold the handle firmly with the cutting path directed away from the body.
2. Position the blade carefully at the intended cutting point.
3. Make a controlled cut without twisting or forcing the blade.
4. Keep the free hand away from the cutting path.
5. Check the result and repeat carefully if needed.
6. Clean the blade and fit the sheath after use.

⚠ Safety

- Never cut toward the body or supporting hand.
- Keep the blade away from children and bystanders.
- Do not use a loose, cracked, or blunt damaged blade.
- Carry and store the knife with its blade covered.

Care & storage

- Clean and dry the blade after use.
- Apply suitable rust protection when needed.
- Inspect the handle and fasteners regularly.

- Store in a dry, secure location.

Common mistakes to avoid

- Using the knife for tasks beyond its design.
- Cutting toward the hand or body.
- Leaving the blade wet or dirty.
- Storing the knife without its sheath.
