Covers these lab items: Hori Hori Knife; Hori Hori Knife (Soil Knife); Hori Knife

What it is used for

To dig, transplant, weed, and cut small roots using a Hori Hori garden knife. To use the blade and measuring markings carefully for controlled gardening tasks.

Main parts

- Steel blade
- Sharp or serrated edge, depending on model
- Handle and grip
- Depth markings, if fitted
- Protective sheath

Before you start

1. Inspect the blade, handle, and sheath for damage or looseness.
2. Check the soil for hidden cables, pipes, stones, or other hazards before digging.
3. Wear suitable gloves and closed footwear.
4. Confirm the tool is appropriate for the soil and task.

How to use

1. Hold the handle securely and keep the blade directed away from the body.
2. Insert the blade into the soil at the required location using controlled pressure.
3. Use the blade to loosen soil or lift small weeds and seedlings carefully.
4. Cut small roots only where safe and appropriate.
5. Use depth markings as a guide when provided, not as a substitute for checking underground hazards.
6. Clean the blade and place it in its sheath after use.

⚠ Safety

- Keep fingers clear of the blade and serrated edge.
- Never use the knife to probe near suspected electrical or utility lines.
- Do not twist excessively or use the tool as a pry bar.
- Keep the sheathed tool away from children and bystanders.

Care & storage

- Remove soil and plant residue after use.

- Dry the blade thoroughly to prevent rust.
- Inspect the edge and handle regularly.
- Store in the supplied sheath in a dry place.

Common mistakes to avoid

- Digging without checking for buried utilities.
- Forcing or twisting the blade in hard soil.
- Holding the soil or plant in the blade path.
- Storing the knife with wet soil on the blade.
