Microphone

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 4 labs

Covers these lab items: Microphone / voice system for lecture and class activities; USB Microphone

What it is used for

To capture and transmit speech using a microphone for lectures, classes, recordings, or presentations. To produce clear audio by positioning the microphone correctly and checking the connected sound system.

Main parts

- Microphone capsule
- Body or handle
- USB or audio connector
- Cable or wireless transmitter
- Power or mute control, if fitted
- Stand or mounting clip

Before you start

1. Check the microphone, cable, connector, and stand for damage.
2. Confirm compatibility with the computer, mixer, speaker, or recording device.
3. Charge the battery or connect USB or audio power as required.
4. Choose a suitable position away from loudspeakers to reduce feedback.
5. Check the recording or sound system input level.

How to use

1. Connect the microphone to the correct input or USB port.
2. Select the microphone as the input source on the connected device if required.
3. Position it at a suitable distance from the speaker's mouth.
4. Set the input gain to a low starting level.
5. Speak normally and check the level through headphones or the sound system.
6. Adjust gain and position until speech is clear without clipping or feedback.
7. Mute the microphone when it is not needed.
8. After use, switch it off and disconnect it safely.

⚠ Safety

- Keep connectors and electrical equipment dry.
- Avoid pointing microphones toward loudspeakers at high volume.
- Secure cables to prevent trips and connector damage.
- Use only compatible power supplies and batteries.

Care & storage

- Wipe the microphone with an approved cleaning method after use.
- Do not immerse the microphone or connector in liquid.
- Coil cables loosely and avoid sharp bends.
- Store in a clean, dry case.

Common mistakes to avoid

- Placing the microphone too far from the speaker.
- Setting gain too high and causing distortion or feedback.
- Using the wrong input or incompatible connector.
- Pulling the cable to disconnect the microphone.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
