# Paint Roller

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 4 labs

**Covers these lab items:** Roller Brush set 5 in 1

## What it is used for

To apply paint evenly to walls and other suitable surfaces using a paint roller. To achieve a smooth finish while reducing splashes and paint waste.

## Main parts

- Roller frame and handle
- Roller sleeve or cover
- Paint tray
- Extension pole, if required
- Scraper or cleaning tool

## Before you start

1. Choose a roller sleeve suitable for the paint and surface texture.
2. Check the roller frame and sleeve for damage or loose parts.
3. Prepare the surface and protect nearby areas from paint splashes.
4. Wear gloves, eye protection, and suitable work clothing.

## How to use

1. Pour a suitable amount of paint into the tray.
2. Load the roller evenly and remove excess paint on the tray grid.
3. Apply paint in overlapping strokes over a manageable area.
4. Maintain steady pressure and avoid pressing too hard.
5. Check coverage and smooth out visible roller marks.
6. Allow the coat to dry as directed before applying another coat.
7. Clean the roller or dispose of the sleeve according to the paint instructions.

## ⚠ Safety

- Ensure adequate ventilation when using paint.
- Keep paint away from eyes and skin.
- Use a stable platform when working at height.
- Keep paint and cleaning solvents away from flames.

## Care & storage

- Remove excess paint before cleaning.

- Clean reusable sleeves according to the paint type.
- Dry and store the roller frame properly.
- Replace worn or damaged sleeves.

## Common mistakes to avoid

- Overloading the roller and causing drips.
- Using the wrong sleeve for the surface.
- Painting over a dirty or damp surface.
- Leaving paint to harden on reusable equipment.

*Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.*
