Razor

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 4 labs

Covers these lab items: Razor with blade

What it is used for

To shave or remove hair using a suitable razor. To reduce skin irritation and cuts through proper preparation, controlled strokes, and hygienic blade handling.

Main parts

- Razor handle
- Blade or cartridge
- Blade guard or cover
- Grip area

Before you start

1. Check that the razor and blade are clean and undamaged.
2. Wash the skin and soften hair with suitable water or shaving product.
3. Use a personal razor and avoid sharing blades.
4. Prepare a clean place for rinsing and disposal.

How to use

1. Apply suitable shaving gel or cream if needed.
2. Hold the razor with a secure grip.
3. Shave using short, gentle strokes in the direction recommended for the skin and hair.
4. Rinse the blade frequently to remove hair and product buildup.
5. Avoid repeated pressure over irritated or damaged skin.
6. Rinse the skin and apply a suitable aftercare product if appropriate.
7. Rinse and dry the razor safely, then cover or store it.

⚠ Safety

- Keep the blade away from children and other users.
- Do not use a rusty, damaged, or blunt blade.
- Avoid shaving over infected wounds or severely irritated skin.
- Dispose of replaceable blades in a suitable sharps container.

Care & storage

- Rinse and dry the razor after use.
- Replace blades when dull or damaged.

- Store in a clean, dry place.
- Do not share razors or cartridges.

Common mistakes to avoid

- Applying excessive pressure.
- Using a dull blade or shaving dry skin without suitable preparation.
- Sharing a razor.
- Leaving the razor wet in an unclean area.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
