Striking Needle

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 4 labs

Covers these lab items: Needle for Striking

What it is used for

To guide stitches or manipulate fabric during textile and handicraft work using a striking needle. To work carefully without damaging the material or injuring the hands.

Main parts

- Needle shaft
- Pointed tip
- Eye or thread opening, if fitted
- Handle or grip, if fitted

Before you start

1. Select a needle suitable for the material and task.
2. Check the needle for bends, cracks, or a damaged tip.
3. Secure the fabric or workpiece on a stable surface.
4. Keep fingers clear of the needle path.

How to use

1. Mark the intended stitch or insertion point.
2. Hold the needle securely by its handle or safe grip area.
3. Position the tip at the marked point.
4. Guide the needle through the material using controlled pressure.
5. Pull the needle through carefully without forcing it.
6. Check the result and repeat as needed.
7. Place the needle in a safe holder after use.

⚠ Safety

- Keep the sharp tip pointed away from the body.
- Do not use a bent or damaged needle.
- Avoid leaving needles loose in fabric or on work surfaces.
- Use a suitable needle holder when required.

Care & storage

- Wipe the needle clean after use.
- Keep it dry to prevent corrosion.

- Store in a labelled needle case or holder.
- Replace damaged needles promptly.

Common mistakes to avoid

- Using the wrong needle for the material.
- Forcing the needle through resistant material.
- Leaving the needle hidden in fabric.
- Storing the needle loose and exposed.
