Tagging Machine

Category: **Retail, Logistics & Warehouse** Type: **Short SOP** Priority: **Medium** 4 labs

Covers these lab items: Tagging Machine; Tagging set

What it is used for

To attach identification tags to products, garments, or items using a tagging machine. To secure tags consistently without damaging the item or injuring the operator.

Main parts

- Tagging tool body
- Needle or fastener applicator
- Trigger or lever
- Tag fasteners
- Product tags
- Needle guard, if fitted

Before you start

1. Confirm that the tagging tool is suitable for the product and tag type.
2. Inspect the tool and needle for damage or looseness.
3. Load compatible fasteners according to the instructions.
4. Position the item so the tag can be attached at an approved location.

How to use

1. Hold the item securely without stretching or damaging it.
2. Place the tag at the intended attachment point.
3. Align the tool needle with the approved tag location.
4. Press the trigger or lever according to the tool instructions.
5. Release the trigger and remove the tool carefully.
6. Check that the tag is secure and the item is undamaged.
7. Engage the needle guard or safety lock after use.

⚠ Safety

- Keep fingers away from the needle path.
- Never point the needle toward the body or another person.
- Do not use a bent or damaged needle.
- Keep tagging tools away from children and unauthorized users.

Care & storage

- Remove tag fragments and debris after use.
- Inspect the needle and trigger mechanism regularly.
- Store with the needle guard engaged.
- Replace damaged parts before further use.

Common mistakes to avoid

- Attaching tags in an unsuitable or visible damage-prone area.
- Placing fingers behind the material in the needle path.
- Using incompatible fasteners.
- Leaving the needle exposed during storage.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
