Animal Awakener

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Animal awakener

What it is used for

To use an approved animal-awakening or stimulation device only for its intended animal-care application. To follow veterinary or manufacturer guidance and avoid unnecessary stress or injury to the animal.

Main parts

- Device body
- Control switch or trigger
- Contact or stimulation component, if fitted
- Power source, if applicable
- Protective housing

Before you start

1. Confirm the exact device type, intended purpose, and approved method of use.
2. Consult a veterinarian or trained animal-care supervisor where required.
3. Inspect the device for damage, exposed wires, or malfunction.
4. Ensure the animal is handled in a calm, controlled environment.
5. Check power settings and accessories according to the instructions.

How to use

1. Prepare the animal and surrounding area according to the approved procedure.
2. Position the device as directed by the manufacturer or veterinary professional.
3. Activate it only for the specified duration and purpose.
4. Observe the animal continuously for signs of distress or adverse reaction.
5. Stop immediately if the animal shows pain, panic, or injury.
6. Clean and store the device according to its instructions.
7. Record the use and any abnormal response when required.

⚠ Safety

- Do not use an unidentified device or an unapproved stimulation method.
- Never apply painful or excessive stimulation to an animal.
- Use only under appropriate veterinary or trained supervision.
- Keep electrical components away from water and wet surfaces.
- Stop use and seek professional help if the animal is injured or distressed.

Care & storage

- Clean contact surfaces after use according to the instructions.
- Inspect controls, casing, and power connections regularly.
- Store securely away from animals and children.
- Report faults and do not use damaged equipment.

Common mistakes to avoid

- Using the device without confirming its intended purpose.
- Applying stimulation for too long or at an excessive setting.
- Ignoring signs of animal distress.
- Using a damaged or unapproved device.
