Barber Brush

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Barber Brush

What it is used for

To remove loose hair and distribute grooming products during barbering. To maintain hygiene by cleaning the brush between clients and storing it properly.

Main parts

- Brush handle
- Bristles
- Brush head
- Grip or hanging loop, if fitted

Before you start

1. Inspect the bristles and handle for damage or loose parts.
2. Ensure the brush is clean and dry before use.
3. Use a brush suitable for the intended grooming task.
4. Follow salon hygiene procedures between clients.

How to use

1. Hold the brush by its handle.
2. Use gentle strokes to remove loose hair from the neck or work area as appropriate.
3. For product application, follow the salon's approved procedure.
4. Avoid brushing over irritated or broken skin.
5. Remove loose hair from the brush after use.
6. Clean and disinfect the brush as required and allow it to dry.

⚠ Safety

- Do not use a brush with sharp, broken, or contaminated bristles.
- Avoid sharing a brush without proper cleaning and disinfection.
- Keep the brush away from eyes and irritated skin.
- Follow hygiene and infection-control requirements.

Care & storage

- Remove trapped hair after each use.
- Wash and disinfect according to the brush material and salon procedure.
- Dry completely before storage.

- Replace worn or damaged brushes.

Common mistakes to avoid

- Using a contaminated brush between clients.
- Applying excessive pressure to the skin.
- Storing the brush while wet.
- Ignoring loose or damaged bristles.
