Biometric Scanner

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Biometric and document verification tools (simulated setup); Biometric devices; Iris scanner

What it is used for

To verify identity using a biometric scanner in an authorized or simulated verification setup. To capture biometric data accurately while protecting personal information.

Main parts

- Scanner or sensor
- Display or indicator lights
- USB or network connection
- Verification software
- User interface

Before you start

1. Confirm authorization and explain the verification process to the user.
2. Inspect the scanner and connection cables for damage.
3. Ensure the required software is running and the device is recognized.
4. Check that the sensor surface is clean.
5. Use only approved test data in simulated training activities.

How to use

1. Open the authorized verification application.
2. Select the correct verification mode, such as fingerprint or iris scanning.
3. Ask the user to follow the displayed positioning instructions.
4. Capture the biometric sample using the device prompts.
5. Review the quality indicator and repeat only if required.
6. Check the verification result displayed by the authorized system.
7. End the session and secure or clear temporary data according to policy.

⚠ Safety

- Obtain appropriate consent and follow applicable privacy rules.
- Do not collect or share biometric data without authorization.
- Never attempt to bypass identity verification controls.
- Do not scan irritated eyes or use an iris scanner contrary to its instructions.

Care & storage

- Clean the sensor using the manufacturer's approved method.
- Keep the scanner protected from dust and moisture.
- Update software only through authorized procedures.
- Report connection errors or unreliable readings.

Common mistakes to avoid

- Using the wrong verification mode.
- Positioning the finger or eye incorrectly.
- Allowing unauthorized access to biometric records.
- Treating a failed scan as proof of a person's identity or intent.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
