Dermascope

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Derma scope; Derma scope Auto scope

What it is used for

To magnify and examine skin or scalp surfaces during a beauty or skin-care assessment. To obtain a clear view while maintaining hygiene and avoiding irritation.

Main parts

- Magnifying lens
- Light source, if fitted
- Handle or body
- Focus or magnification control, if fitted
- Power source, if applicable

Before you start

1. Inspect the lens, light, and body for damage.
2. Clean the lens and contact surfaces using the approved method.
3. Ensure the device is suitable for the intended examination.
4. Explain the procedure and obtain consent where required.
5. Check that the skin area is clean and suitable for examination.

How to use

1. Switch on the light if the device requires power.
2. Position the dermascope at the recommended distance or contact point.
3. Adjust focus or magnification if available.
4. Examine the area systematically under suitable lighting.
5. Avoid pressing hard against the skin.
6. Record relevant observations according to workplace procedures.
7. Switch off and clean the device after use.

⚠ Safety

- Do not use a damaged lens or electrical device.
- Avoid contact with broken or infected skin unless the device and procedure are approved for it.
- Disinfect contact surfaces between clients according to instructions.
- Do not present observations as a medical diagnosis unless qualified to do so.

Care & storage

- Clean lenses with suitable optical materials.
- Keep the device dry and protected from dust.
- Check batteries and light function where applicable.
- Store in a protective case.

Common mistakes to avoid

- Using a dirty lens or contact surface.
- Holding the device at an unsuitable distance.
- Pressing excessively on the skin.
- Making medical conclusions beyond the operator's qualifications.
