Embroidery Hoop

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Embroidery frame; Embroidery Frames or Hoop; Embroidery hoop

What it is used for

To hold fabric taut for hand embroidery or stitching using an embroidery hoop. To maintain even fabric tension without stretching or marking the material.

Main parts

- Inner ring
- Outer ring
- Adjusting screw or clamp
- Fabric surface

Before you start

1. Select a hoop size suitable for the design and fabric.
2. Inspect both rings and the adjustment mechanism for cracks or rough edges.
3. Ensure the fabric is clean and correctly positioned.
4. Loosen the adjustment screw enough to separate the rings.

How to use

1. Place the inner ring on a flat surface.
2. Lay the fabric evenly over the inner ring.
3. Position the outer ring over the fabric and inner ring.
4. Press the rings together without trapping folds.
5. Tighten the adjustment screw gradually.
6. Pull the fabric edges gently until the surface is taut but not stretched.
7. Check tension before stitching and readjust if necessary.
8. Release the fabric and loosen the hoop after finishing.

⚠ Safety

- Keep fingers clear of the closing gap between the rings.
- Do not overtighten the screw or stretch delicate fabric excessively.
- Avoid using hoops with splinters or sharp edges.

Care & storage

- Remove loose threads and dust after use.
- Wipe the hoop clean and dry it if needed.

- Loosen the hoop when storing fabric for a long period.
- Store flat in a dry location.

Common mistakes to avoid

- Trapping folds between the rings.
- Tightening the screw too quickly or excessively.
- Stretching the fabric until its shape changes.
- Leaving delicate fabric tightly hooped during long storage.
