# Equipment Stand

Category: **Automotive** Type: **Short SOP** Priority: **Medium** 3 labs

**Covers these lab items:** Equipment stands

## What it is used for

To support automotive equipment securely at a suitable working height during inspection or maintenance. To prevent tipping, movement, and equipment damage by using a correctly rated stand.

## Main parts

- Base or support feet
- Vertical post or frame
- Equipment mounting platform
- Height adjustment mechanism, if fitted
- Locking pins or fasteners

## Before you start

1. Confirm the stand's load rating and compatibility with the equipment.
2. Inspect the base, frame, fasteners, and locking mechanism for damage.
3. Place the stand on a firm, level surface.
4. Check that the equipment's centre of gravity can be supported safely.
5. Use suitable lifting equipment and trained assistance for heavy loads.

## How to use

1. Position the stand in the designated work area.
2. Adjust the height before placing the load whenever possible.
3. Secure any adjustable sections with the specified locking mechanism.
4. Place the equipment centrally on the support platform.
5. Fasten the equipment using the approved mounting points.
6. Check stability and confirm that the stand does not rock or shift.
7. Remove the load before adjusting or moving the stand.

## ⚠ Safety

- Never exceed the rated load capacity.
- Do not work under equipment supported only by an unstable stand.
- Keep hands and feet clear of pinch points during loading.
- Do not move a loaded stand unless it is designed and approved for that purpose.

## Care & storage

- Clean the platform and base after use.
- Inspect welds, fasteners, locks, and support feet regularly.
- Lubricate adjustment mechanisms only as specified.
- Store the stand in a dry area and remove damaged units from service.

## Common mistakes to avoid

- Using a stand with insufficient load capacity.
- Placing the stand on uneven ground.
- Leaving height-adjustment locks unsecured.
- Moving or adjusting the stand while loaded.
