Feedback Kiosk

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Customer feedback kiosks and digital record systems; Digital feedback kiosks or tablets for guest surveys; Digital kiosks for self-check-in/check-out

What it is used for

To collect customer feedback or support digital self-check-in and check-out using a feedback kiosk or tablet. To provide a clear user experience while protecting personal and transaction data.

Main parts

- Touchscreen or display
- Kiosk body or stand
- Computer or tablet unit
- Network connection
- Power supply
- Printer or scanner, if fitted
- Feedback or check-in software

Before you start

1. Inspect the screen, stand, cables, and peripherals for damage.
2. Confirm the kiosk is powered and connected to the approved network.
3. Check that the correct feedback or check-in application is open.
4. Ensure privacy notices and user instructions are visible where required.
5. Verify that the system does not display another user's private information.

How to use

1. Welcome the user or display the starting screen.
2. Ask the user to follow the on-screen instructions.
3. Select the appropriate survey, feedback, or check-in/check-out option.
4. Enter or scan only the information required for the task.
5. Review the displayed details before confirming a transaction or submission.
6. Show a completion message or receipt if the system provides one.
7. Return the kiosk to its starting screen and ensure the previous session is closed.

⚠ Safety

- Do not expose passwords, payment details, or personal information on a public screen.
- Use approved network and software settings only.
- Do not attempt to bypass access controls or tamper with records.
- Report suspicious activity, device damage, or software errors.

Care & storage

- Clean the touchscreen with a compatible method.
- Keep cables secured and the kiosk area unobstructed.
- Check printer paper or scanner function where applicable.
- Install updates and review access settings through authorized administration.

Common mistakes to avoid

- Leaving a previous user's session open.
- Entering information into the wrong user's record.
- Ignoring privacy notices or confirmation screens.
- Disconnecting power during an active transaction.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
