Flow Meter

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Flow meter

What it is used for

To measure the rate or quantity of liquid or gas flowing through a pipe or system.

How to handle

- Inspect the flow meter body, display, connectors, and seals for damage or leakage.
- Confirm that the meter is suitable for the fluid, flow range, pressure, and temperature.
- Install the meter in the specified direction and position according to the manufacturer's instructions.
- Start the flow gradually and record readings after they stabilise, using the correct units.
- Stop the flow safely, relieve pressure where required, and clean or maintain the meter according to its manual.

Storage

- Store clean and dry in a protected location within the manufacturer's specified conditions.
- Protect measuring ports, seals, and display from dust, impact, and moisture.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
