GPS Device

Category: **Telecom & Networking** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Advanced GPS devices and trail mapping tools; Advanced GPS units; Basic GPS devices

What it is used for

To determine geographic position and support navigation, route recording, and trail mapping.

How to handle

- Inspect the device, screen, buttons, antenna, and battery before use.
- Charge the battery and enable location services or satellite reception as specified by the device manual.
- Move to an area with a clear view of the sky and allow the device to acquire a reliable satellite fix.
- Select the correct coordinate system, map, or tracking mode and record position or route data as needed.
- Handle the device carefully, save important records, and switch it off when no longer required.

Storage

- Store in a protective case in a dry location within the recommended temperature range.
- Keep maps, cables, and accessories organised and protect the device from impact and moisture.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
