Hand Plane

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Hand Plane; Iron Plane

What it is used for

To smooth, flatten, or shape wooden surfaces by removing thin shavings.

How to handle

- Inspect the plane body, handle, blade, and adjustment mechanism for damage or looseness.
- Secure the workpiece firmly on a stable workbench before planing.
- Adjust the blade for a suitable shaving depth and check that it is properly secured.
- Push the plane along the wood grain with controlled, even strokes while keeping hands clear of the blade.
- Retract or cover the blade when finished and remove wood shavings from the tool.

Storage

- Store clean and dry with the blade retracted or covered.
- Keep the cutting edge protected and apply suitable rust prevention if specified for the tool.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
