IV Stand

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: IV Stand

What it is used for

To support an intravenous fluid bag or infusion container at a suitable height during clinical care.

How to handle

- Inspect the stand, base, wheels, pole, hooks, and adjustment locks for damage or instability.
- Place the stand on a level surface and lock the wheels when it is in position.
- Adjust the height and secure the infusion container using the designated hook without exceeding the stand's rated load.
- Keep the stand clear of walkways and prevent tubing from becoming tangled or creating a trip hazard.
- Clean the stand according to healthcare facility procedures and report defects before further use.

Storage

- Store clean and dry in a designated clinical equipment area with the pole secured.
- Keep hooks and wheels protected from damage and avoid placing heavy items on the stand.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
