Plaster Scratcher

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Scratcher

What it is used for

To scratch or roughen a plaster or render surface to improve the mechanical key for a subsequent coat.

How to handle

- Inspect the scratcher teeth, handle, and body for damage or loose parts before use.
- Wear safety glasses, gloves, and a suitable dust mask when working with dry plaster or masonry.
- Use controlled strokes to create an even pattern of grooves while avoiding excessive pressure that may damage the base coat.
- Keep other workers clear of the immediate work area and avoid contact with hidden electrical cables or services.
- Remove plaster residue and inspect the tool after use.

Storage

- Store clean and dry in a designated construction-tool area.
- Protect the teeth from damage and keep the tool away from moisture and corrosive materials.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
