Rotary Cutter

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Rotary Cutter

What it is used for

To cut fabric, paper, or other suitable sheet materials accurately using a rotating circular blade.

How to handle

- Inspect the blade, handle, blade guard, and locking mechanism for damage before use.
- Place the material on a suitable cutting mat and align it with the required cutting marks.
- Keep fingers and other body parts away from the blade path and use a ruler or guide designed for rotary cutting where appropriate.
- Roll the cutter away from the body using controlled pressure; never leave the blade exposed when not cutting.
- Engage the blade guard or lock immediately after use and replace or secure the blade only according to the manufacturer's instructions.

Storage

- Store with the blade guard engaged in a designated tool case or drawer.
- Keep spare blades covered and out of reach of children.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
