Scabbling Hammer

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Scrabbling Hammer

What it is used for

To roughen or remove surface material from concrete or masonry to prepare it for repair or a subsequent layer.

How to handle

- Inspect the hammer head, striking points, handle, and joints for cracks, wear, or looseness.
- Wear safety goggles or a face shield, hearing protection, gloves, safety footwear, and suitable respiratory protection for dust exposure.
- Secure the workpiece or confirm the surface is stable, and clear other people from the work area.
- Strike the surface with controlled blows, maintaining a secure grip and avoiding hidden services or unstable material.
- Stop if the tool becomes loose or damaged, and remove dust and debris using an appropriate method after work.

Storage

- Clean and dry the tool before placing it in a designated tool rack.
- Keep the striking points protected and store away from moisture and corrosive materials.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
