Scutch Hammer

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Medium** 3 labs

Covers these lab items: Scutch

What it is used for

To remove mortar, plaster, or surface projections from masonry using an appropriate scutch head or attachment.

How to handle

- Inspect the hammer, handle, head, and scutch attachment for damage, wear, or loose fittings.
- Fit only the correct compatible attachment and ensure it is secured according to the manufacturer's instructions.
- Wear eye and face protection, gloves, safety footwear, hearing protection, and appropriate dust protection.
- Hold the tool firmly and use controlled strokes, keeping other people clear of flying chips and debris.
- Stop work if the head or attachment loosens, then clean the tool and inspect it after use.

Storage

- Store clean and dry in a designated masonry-tool rack with attachments secured.
- Protect striking edges from damage and keep the tool away from moisture.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
